

FOR IMMEDIATE RELEASE

BATM Advanced Communications Ltd. Completes acquisition of Resolute Networks Ltd.

Company acquisition to bolster BATM Group's data and telecommunications offering with proven and innovative CES (circuit emulation solutions)

Modi'in, Israel and Kfar Netter, Israel, January 22, 2008 – Resolute Networks Ltd. today announced that it has entered into definitive agreements with BATM Advanced Communications, under which Resolute is to be acquired by BATM. Resolute Networks is to become a wholly-owned subsidiary of BATM, and will continue development and operations as an independent company. This acquisition joins together two data and telecommunication pioneers with complementary product offerings, customers and channels, resulting in a combined group with the professional know-how, technology, and manufacturing capability required to assume a leading role in the carrier IP/Ethernet/MPLS and CES markets. Following the acquisition, Mr. Brian Bortz, previously VP of Marketing and Sales at Resolute Networks, will serve as Resolute's Chief Executive Officer.

"BATM and Resolute have proven to be leaders and innovators in their respective markets," says Zvi Marom, Chief Executive Officer of the BATM Advanced Communications Group. "I am certain that this strategic acquisition will lend us greater capacity for innovation and a broader base of complementary products, customers and technology offerings, all of which will help us propel our combined organization to the next level."

"Resolute Networks has established a formidable track record in delivering unique yet standards-compliant solutions for circuit emulation applications," states Brian Bortz, Chief Executive Officer of BATM-owned Resolute Networks. "BATM Advanced Communications' strong reputation and leading market position will effectively enable Resolute to accelerate its rate of innovation and market penetration even further."

About BATM Advanced Communications

BATM Advanced Communications Ltd. designs and produces broadband data and telecommunications solutions geared toward the needs of corporate and Telecom networks.

Since its foundation in 1992, BATM has excelled in the design and manufacturing of innovative high-performance communications equipment. Its leading edge technologies comprise fiber optic networking, multi-service transport, access solutions, and integrated IP voice, video and data services. BATM develops and produces an extensive line of all layer routing IP switches and muxes. Advanced optical solutions are integrated in many of those switches. Headquartered in Kfar Netter, Israel, BATM operates numerous subsidiaries in the United States, France, Germany and APAC. Employing over 400

employees worldwide, BATM maintains a highly integrated research and development program between all its subsidiary companies.

About Resolute Networks

Resolute Networks Ltd. is a leading provider of standards-compliant subsystem and OEM solutions for circuit emulation applications. Resolute solutions are based on the company's unique silicon and module technology, which is optimized to support high performance converged telecommunication services over Ethernet, MPLS and IP infrastructure. Headquartered in Modi'in, Israel, Resolute Networks maintains a worldwide presence and successfully markets its products in North America, Europe and Asia.
